

Release Notes — Milestone 2

Overview

Milestone 2 merupakan tahap pengembangan lanjutan aplikasi **Kelarin**, yaitu aplikasi manajemen tugas berbasis cloud yang dirancang untuk membantu mahasiswa mengelola tugas akademik secara terstruktur dan kolaboratif.

Pada milestone ini, tim berhasil menyelesaikan proses deployment production, CI/CD pipeline, production testing, monitoring service, serta penyempurnaan dokumentasi project.

Features Completed

Authentication

- User registration
- User login
- Session authentication

Task Management

- Create task/item
- Read task list
- Update task/item
- Delete task/item
- Search task feature

Deployment & DevOps

- Docker containerization
- Docker Compose setup
- GitHub Actions CI/CD pipeline
- Health endpoint monitoring ([/health](#))
- Production testing documentation

Documentation (W9-W11)

- Git workflow guide
 - Deployment guide
 - Production testing report
 - Milestone retrospective
 - Release notes documentation
-

Production URLs

Service	URL
Frontend	https://cc-kelompok-a-ethereal-production.up.railway.app/
Backend API	https://kelarin.up.railway.app/
API Docs	https://kelarin.up.railway.app/docs

Tech Stack

Category	Technology
Frontend	React + Vite
Backend	FastAPI
Database	PostgreSQL
Containerization	Docker
CI/CD	GitHub Actions
Deployment	Railway
Version Control	Git & GitHub

Production Validation

Berikut validasi yang telah dilakukan pada environment production:

Test	Status
Frontend accessible	☒ Passed
Backend API accessible	☒ Passed
Health endpoint working	☒ Passed
User authentication	☒ Passed
CRUD functionality	☒ Passed
Docker container running	☒ Passed
CI/CD pipeline	☒ Passed

Known Issues

- Beberapa endpoint masih membutuhkan optimasi response time.
- Proses backup database saat ini masih dijalankan secara berkala tanpa otomatisasi penuh.
- Monitoring log masih dilakukan secara manual melalui Railway dashboard.

Release Tag

```
git tag v2.0
```

Milestone 2 menandai versi stabil pertama aplikasi Kelarin yang berhasil berjalan pada production environment berbasis cloud.
